

SOUTH INDIA SURGICAL CO.PVT.LTD.,

80 YEARS IN THE SERVICE OF SURGERY

Welcome

South India Surgical Company Pvt. Ltd., widely recognised as SISCO, has been a leading manufacturer of high-quality surgical instruments for over 80 years. Founded in 1945 by Mr. P.N.Bajaj with the vision of creating a premier surgical instrument manufacturing company in India, SISCO has established itself as a pioneer in the Indian surgical industry. Addressing the growing need for advanced surgical tools in Indian hospitals, SISCO has become one of the oldest and most respected manufacturers in the country. For eight decades, SISCO has been dedicated to providing top-quality instruments that enhance patient care.

Today, SISCO continues its legacy of excellence by delivering high-quality, handcrafted instruments tailored to meet the evolving needs of surgeons. As surgical techniques and requirements advance, specialty surgeons rely on SISCO for instruments that adapt to their changing needs. Our industry-leading research and development team supports this commitment with innovative ideas and valuable insights. We believe that successful surgeries depend on the right tools in the hands of skilled professionals. Our instruments are trusted by thousands of doctors across India and globally, known for their quality, durability, and performance. SISCO offers a comprehensive range of products, all crafted to the highest standards.

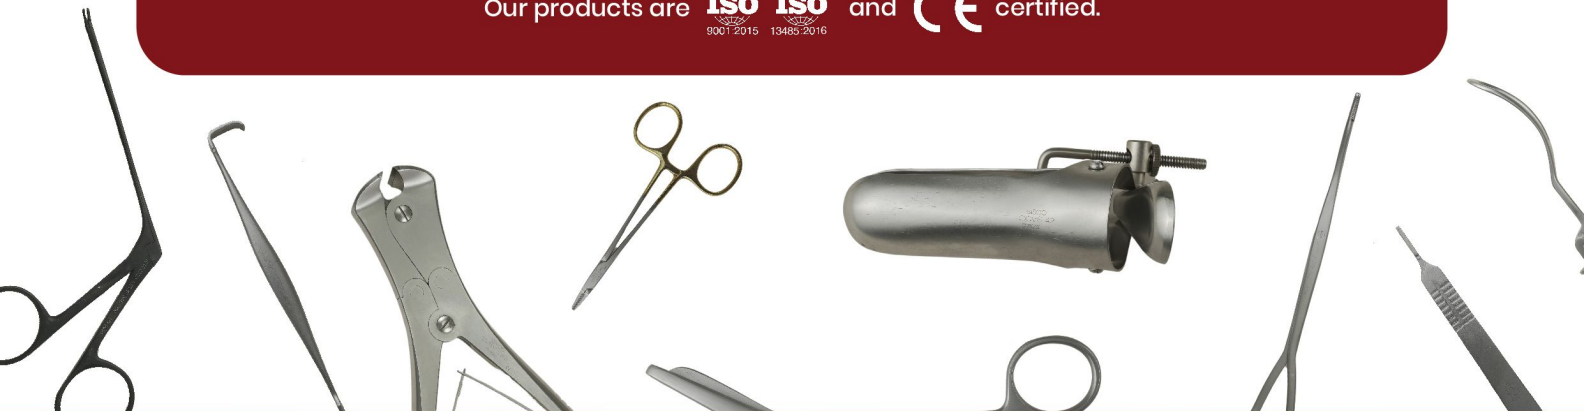

World - Class Quality

SISCO consistently upholds superior quality standards and is dedicated to exceptional customer service and satisfaction. Our instruments are engineered to meet the highest benchmarks for precision, reliability, and consistency. Constructed from the finest surgical-grade stainless steel, SISCO instruments offer optimal corrosion resistance, durability, and strength, ensuring impeccable functionality.

Each instrument undergoes a rigorous quality control process, including comprehensive product inspections that verify form, fit, and function. This meticulous attention to detail enhances the longevity of our instruments and minimises the need for repairs or replacements. At SISCO, we are committed to continually improving our products to better serve our customers.

Our products are   and  certified.

Factory

Our factory features state-of-the-art manufacturing facilities, including dye forging technology, making us the only company in India with this capability for producing surgical instruments. We also utilise advanced CNC machines to ensure precision in every instrument. Our hygienic and sterile rooms, classified as Class 10,000, are dedicated to manufacturing disposable medical products. Additionally, we have a large in-house ETO steriliser and a well-equipped quality control department to maintain the highest product standards. With a dedicated service team for instrument maintenance and support, SISCO employs approximately 500 skilled professionals. All our products are CE marked, and our company holds certifications for quality management systems under ISO 9001 : 2015 and ISO 13485 : 2016

Solutions

As a trailblazer in surgical technologies for decades, SISCO has collaborated with world-class surgeons to develop a range of instruments and solutions that keep pace with the evolving demands of global surgical practices. Our Research and Development team, supported by a core group of experienced engineers, is at the forefront of innovation. We offer a comprehensive range of services, including instrument and catheter design, and provide training programs for doctors and technicians on operating and maintaining their medical equipment. Our service engineers are available around the clock to address breakdowns and provide standby equipment in emergencies.

Guarantee / Warranty

SISCO offers a two-year warranty on surgical instruments against manufacturing defects. Instruments stamped or etched with the SISCO mark are guaranteed to be free from defects in material or workmanship for their lifetime. Under this warranty, we will repair, replace, or refurbish any defective instrument at no charge. This warranty is void if instruments are not properly maintained or used for their intended surgical purpose. It does not cover instruments that have been modified without SISCO's approval, subjected to undue stress, or have had their original identification marks altered or removed. Warranty terms may be updated periodically by SISCO.

SISCO Marketing

With exceptional marketing capabilities, SISCO proudly represents esteemed multinational surgical equipment manufacturers.
